Abstract
Entrepreneurship is an engine of growth in every society. Studies on the relationship between entrepreneurship and ethics are scanty. Thus, this research is designed to investigate ethical values embedied in entrepreneurship with a special focus on Islamic values ideal to entrepreneurship. This research finds ethical values with respect to Islamic entrepreneurship are indispensable factors as they constitute its essential element. Thus, four axioms of economic developed by Naqvi are just supporting evidence for what has deeply rooted in Islamic values and applicable to every aspects of human activities, and specifically to entrepreneurial activities.
